Test Level 3 Budgeting

Name: _____

Plan to feed 10 people for a weekend.

The weekend includes the following meals:
Friday – Evening meal
Saturday – Breakfast, Lunch and Evening meals
Sunday – Breakfast

Location is going to be a State Park:
You are going to need 2 Campsites
You will need 2 vehicles to transport the camping supplies and people.
You will want a campfire each night. (You will need to buy wood.)

The tents and cooking supplies you own already

One campsite costs $15 per day. (a day is from 3 PM one day to 1 PM the next)
Park pass costs $12 per day per vehicle. (this is a calendar day)
The park is 100 miles from your home.
It costs $0.55 per mile to operate a vehicle.
Fire wood costs $5 a bundle (a bundle will burn for 3 hours)

Limitations:
Breakfast – No cereal
Evening meal – Must be completely different between the two days
You must have all the food groups at each meal

Your budget is $650.

Plan out what you are going to serve and the needed quantity of each item. Go to your local grocery store and find out what the cost would be for all the meals.

Using the template that was given in Level 1, detail the costs for the entire weekend for food and drinks.

Drinks need to be provided even during non-eating period so that you stay hydrated.

Provide a detailed cost estimate for the entire weekend of camping.

Pass ____ Fail ____
